Would you like to provide any feedback on the helpfulness of this program?

4 responses

Making the equation more apparent within the software

As someone who gets overwhelmed by instructions easily, these were intuitive and easy to follow.

This program would help so with assignments that are very tricky

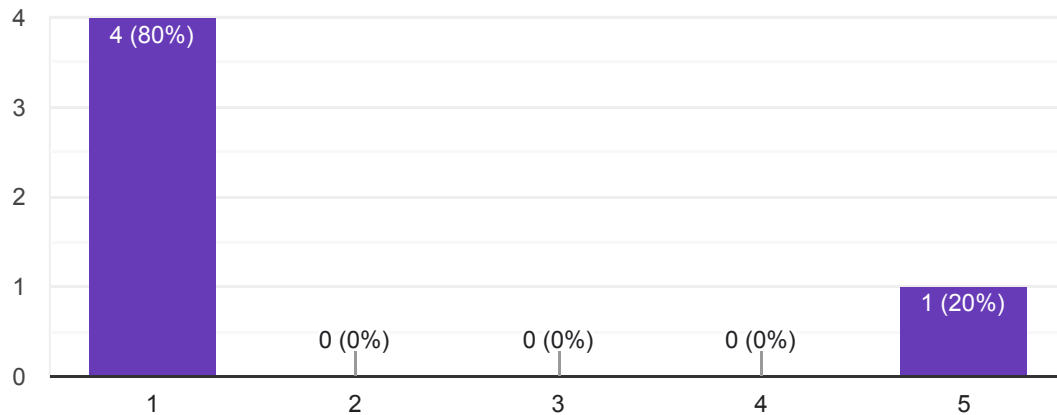

This program was very helpline and could proven understand on adolescents learning algebra

Were you confused at any point while using this program?

5 responses

Was there anything in particular that was confusing?

4 responses

Pretty straightforward

n/a

At the start where I had to put in certain symbols but it was really easy to get a hang of it

No this program was very easy and the commands were very easy

Where there things you really liked about the program?

5 responses

It can actually help people with math

the instructions felt warm and friendly and helpful, like a real tutor

I liked how it really explained the steps until it got to the correct answer

I really liked how the program was talking to you and was reinforcing positive feedback which boost my morale

pretty straightforward and clear

Where there things you disliked about the program?

4 responses

The hoops to access it

nothing stands out as a dislike

No this was a very well coded program

No this was a very well written program

If there was anything you could change what would it be?

4 responses

How to reach the program

n/a

Nope

I can't find anything that I could change since this program was written very well

anything else you'd like to add?

4 responses

Nope

n/a

Very good program 👍

No
