Automated Math Tutor User Testing Assignment

Amelia Threatt

December 14, 2022

These problems are for the user to practice using the program with.

1. Input the following equations into the program with x being the variable, and then go to Feedback Form to provide feedback on the program

   (a) $a + b = c/d * x$

   (b) $a * b - c = d * (e + x)$

   (c) $a + b - c = d/x - e$

   (d) $a - x + b - c * d = e + f$

   (e) $a - x + (b - c) * d = e + f$

2. Input your own equation into the program, with your own variable to solve for. Then go to Feedback Form to provide feedback on the program
